Overview

- Meyersson (2014): *"Islamic Rule and the Empowerment of the Poor and Pious"*
 - **Puzzle:** Does Islamic political control affect women's empowerment?
 - **Theory:** Translation of constituency interests into policies
 - **Identification:** Close elections
 - **The Model:** Regression discontinuity
 - **Empirical Findings:** Islamic rule led to
 - increased female secular high school education over a period of six years,
 - persistent up to 17 years,
 - reduced adolescent marriages, and
 - a decrease in Islamic political preferences.

Introduction

- As many Muslim countries have implemented democratic elections, concerns have been raised that Islamic political control may adversely affect women's living standards.

Introduction

- As many Muslim countries have implemented democratic elections, concerns have been raised that Islamic political control may adversely affect women's living standards.
- Meyersson (2014) examines the causal effects of Islamic political representation on education and related outcomes using a new and unique dataset of 2600 Turkish municipalities.

Introduction

- As many Muslim countries have implemented democratic elections, concerns have been raised that Islamic political control may adversely affect women's living standards.
- Meyersson (2014) examines the causal effects of Islamic political representation on education and related outcomes using a new and unique dataset of 2600 Turkish municipalities.
- Turkey is a useful testing ground for evaluating the consequences of Islamic political representation as it has experienced Islamic party participation in the democratic process for a long period.

Introduction

- As many Muslim countries have implemented democratic elections, concerns have been raised that Islamic political control may adversely affect women's living standards.
- Meyersson (2014) examines the causal effects of Islamic political representation on education and related outcomes using a new and unique dataset of 2600 Turkish municipalities.
- Turkey is a useful testing ground for evaluating the consequences of Islamic political representation as it has experienced Islamic party participation in the democratic process for a long period.
- In 1994, Turkey experienced a seismic political change when the pro-Islamic Refah Party became the second-largest party in terms of votes, giving political Islam unprecedented representation in the democratic system.

Turkey's Demographic Shift and Local Government

-Urbanization in Turkey resulted in a demographic shift in cities, bringing in new groups of citizens from rural areas who were poorer, less-educated, and deeply pious.

Turkey's Demographic Shift and Local Government

-Urbanization in Turkey resulted in a demographic shift in cities, bringing in new groups of citizens from rural areas who were poorer, less-educated, and deeply pious. - These groups were referred to as “Black Turks” and filled working-class neighborhoods and squatter areas, creating microcosms of outsiders simmering with unemployment, poverty, and resentment over inadequate government policies.

Turkey's Demographic Shift and Local Government

-Urbanization in Turkey resulted in a demographic shift in cities, bringing in new groups of citizens from rural areas who were poorer, less-educated, and deeply pious. - These groups were referred to as “Black Turks” and filled working-class neighborhoods and squatter areas, creating microcosms of outsiders simmering with unemployment, poverty, and resentment over inadequate government policies. - Municipalities play a significant role in policymaking, but they are financially weak and have limited formal policy powers beyond basic services such as water provision, waste management, and urban planning.

Islamic Organizations and Education in Turkey

- After the military coup in 1980, legislation was implemented allowing Islamic organizations to take a larger role in civil society as a counterbalance to primarily leftist ideologies.

Islamic Organizations and Education in Turkey

- After the military coup in 1980, legislation was implemented allowing Islamic organizations to take a larger role in civil society as a counterbalance to primarily leftist ideologies.

Islamic Organizations and Education in Turkey

- After the military coup in 1980, legislation was implemented allowing Islamic organizations to take a larger role in civil society as a counterbalance to primarily leftist ideologies.
- These organizations were modern incarnations of the traditional Islamic brotherhood (tarikats) and became essential components of social aid, particularly in education.

Islamic Organizations and Education in Turkey

- After the military coup in 1980, legislation was implemented allowing Islamic organizations to take a larger role in civil society as a counterbalance to primarily leftist ideologies.
- These organizations were modern incarnations of the traditional Islamic brotherhood (tarikats) and became essential components of social aid, particularly in education.

Islamic Organizations and Education in Turkey

- After the military coup in 1980, legislation was implemented allowing Islamic organizations to take a larger role in civil society as a counterbalance to primarily leftist ideologies.
- These organizations were modern incarnations of the traditional Islamic brotherhood (tarikat) and became essential components of social aid, particularly in education.
- Although primary education is mandatory, significant gender inequalities remain, and Turkey ranked 121st out of 128 countries included in a recent Gender Gap Report by the World Economic Forum.

Islamic Organizations and Education in Turkey

- After the military coup in 1980, legislation was implemented allowing Islamic organizations to take a larger role in civil society as a counterbalance to primarily leftist ideologies.
- These organizations were modern incarnations of the traditional Islamic brotherhood (tarikat) and became essential components of social aid, particularly in education.
- Although primary education is mandatory, significant gender inequalities remain, and Turkey ranked 121st out of 128 countries included in a recent Gender Gap Report by the World Economic Forum.

Islamic Organizations and Education in Turkey

- After the military coup in 1980, legislation was implemented allowing Islamic organizations to take a larger role in civil society as a counterbalance to primarily leftist ideologies.
- These organizations were modern incarnations of the traditional Islamic brotherhood (tarikats) and became essential components of social aid, particularly in education.
- Although primary education is mandatory, significant gender inequalities remain, and Turkey ranked 121st out of 128 countries included in a recent Gender Gap Report by the World Economic Forum.
- The current mixed-sex education curriculum remains heavily influenced by its founder, Mustafa Kemal Atatürk, and required students to forego wearing religious symbols in school, including the headscarf for women (by 2014)

The Rise of the Refah Party in Turkey

- In a political vacuum where established parties seemed neither willing to nor capable of accommodating the increasingly concentrated mass of poorer and religiously conservative individuals, the Refah (“Welfare”) Party found its core constituency.

The Rise of the Refah Party in Turkey

- In a political vacuum where established parties seemed neither willing to nor capable of accommodating the increasingly concentrated mass of poorer and religiously conservative individuals, the Refah (“Welfare”) Party found its core constituency.

The Rise of the Refah Party in Turkey

- In a political vacuum where established parties seemed neither willing to nor capable of accommodating the increasingly concentrated mass of poorer and religiously conservative individuals, the Refah (“Welfare”) Party found its core constituency.
- The party was created in 1983 as a continuation of a series of previously banned Islamic political parties and found support among groups as diverse as the urban poor of Turkey.

The Rise of the Refah Party in Turkey

- In a political vacuum where established parties seemed neither willing to nor capable of accommodating the increasingly concentrated mass of poorer and religiously conservative individuals, the Refah (“Welfare”) Party found its core constituency.
- The party was created in 1983 as a continuation of a series of previously banned Islamic political parties and found support among groups as diverse as the urban poor of Turkey.

The Rise of the Refah Party in Turkey

- In a political vacuum where established parties seemed neither willing to nor capable of accommodating the increasingly concentrated mass of poorer and religiously conservative individuals, the Refah (“Welfare”) Party found its core constituency.
- The party was created in 1983 as a continuation of a series of previously banned Islamic political parties and found support among groups as diverse as the urban poor of Turkey.
- By the mid-1990s, the party had struck a chord among a broader segment of Turkish voters by positioning itself as pro-Islamic, anti-West, and anti-establishment.

The Rise of the Refah Party in Turkey

- In a political vacuum where established parties seemed neither willing to nor capable of accommodating the increasingly concentrated mass of poorer and religiously conservative individuals, the Refah (“Welfare”) Party found its core constituency.
- The party was created in 1983 as a continuation of a series of previously banned Islamic political parties and found support among groups as diverse as the urban poor of Turkey.
- By the mid-1990s, the party had struck a chord among a broader segment of Turkish voters by positioning itself as pro-Islamic, anti-West, and anti-establishment.

The Rise of the Refah Party in Turkey

- In a political vacuum where established parties seemed neither willing to nor capable of accommodating the increasingly concentrated mass of poorer and religiously conservative individuals, the Refah ("Welfare") Party found its core constituency.
- The party was created in 1983 as a continuation of a series of previously banned Islamic political parties and found support among groups as diverse as the urban poor of Turkey.
- By the mid-1990s, the party had struck a chord among a broader segment of Turkish voters by positioning itself as pro-Islamic, anti-West, and anti-establishment.
- As tensions between social groups escalated throughout the 1990s, educational facilities became one of several contended platforms where an increasingly concentrated mass of poorer and religiously conservative individuals found the content of, and restrictions to, education incongruous to their preferences.

Identification of Causal Impact of Local Islamic Rule

- A key contribution of the paper is to identify the causal impact of local Islamic rule.

Identification of Causal Impact of Local Islamic Rule

- A key contribution of the paper is to identify the causal impact of local Islamic rule.

Identification of Causal Impact of Local Islamic Rule

- A key contribution of the paper is to identify the causal impact of local Islamic rule.
- Comparing municipal outcomes by whether an Islamic or secular mayor was elected is problematic as the assignment of mayor type is not random.

Identification of Causal Impact of Local Islamic Rule

- A key contribution of the paper is to identify the causal impact of local Islamic rule.
- Comparing municipal outcomes by whether an Islamic or secular mayor was elected is problematic as the assignment of mayor type is not random.

Identification of Causal Impact of Local Islamic Rule

- A key contribution of the paper is to identify the causal impact of local Islamic rule.
- Comparing municipal outcomes by whether an Islamic or secular mayor was elected is problematic as the assignment of mayor type is not random.
- The RD design is used to exploit a discontinuity in the treatment assignment to identify a causal effect.

Identification of Causal Impact of Local Islamic Rule

- A key contribution of the paper is to identify the causal impact of local Islamic rule.
- Comparing municipal outcomes by whether an Islamic or secular mayor was elected is problematic as the assignment of mayor type is not random.
- The RD design is used to exploit a discontinuity in the treatment assignment to identify a causal effect.

Identification of Causal Impact of Local Islamic Rule

- A key contribution of the paper is to identify the causal impact of local Islamic rule.
- Comparing municipal outcomes by whether an Islamic or secular mayor was elected is problematic as the assignment of mayor type is not random.
- The RD design is used to exploit a discontinuity in the treatment assignment to identify a causal effect.
- The main method employed in this paper is local linear regressions.

Main Data Description

- Data on municipal mayoral elections come from the Turkish Statistical Institute (TurkStat) and are reported by municipality.

Main Data Description

- Data on municipal mayoral elections come from the Turkish Statistical Institute (TurkStat) and are reported by municipality.

Main Data Description

- Data on municipal mayoral elections come from the Turkish Statistical Institute (TurkStat) and are reported by municipality.
- Islamic parties received about 20% of the national vote share and won 329 mayoral seats in 1994.

Main Data Description

- Data on municipal mayoral elections come from the Turkish Statistical Institute (TurkStat) and are reported by municipality.
- Islamic parties received about 20% of the national vote share and won 329 mayoral seats in 1994.

Main Data Description

- Data on municipal mayoral elections come from the Turkish Statistical Institute (TurkStat) and are reported by municipality.
- Islamic parties received about 20% of the national vote share and won 329 mayoral seats in 1994.
- The forcing variable used in the RD design is defined as the difference in vote share between the largest Islamic party and the largest secular party, resulting in a cutoff point at zero.

Difference in Vote Share (2 Percentage Point)

Figure 1: The diagonal line is the hypothetical one-to-one relationship between the two variables in an election with only two parties.

Outcome Variables and Control Variables

- The focus of the paper is on high school attainment for individuals whose high school education could have been affected during the period 1994 to 2000.

Outcome Variables and Control Variables

- The focus of the paper is on high school attainment for individuals whose high school education could have been affected during the period 1994 to 2000.

Outcome Variables and Control Variables

- The focus of the paper is on high school attainment for individuals whose high school education could have been affected during the period 1994 to 2000.
- The main outcome variable and control variables come from TurkStat's Population Census of 2000.

Outcome Variables and Control Variables

- The focus of the paper is on high school attainment for individuals whose high school education could have been affected during the period 1994 to 2000.
- The main outcome variable and control variables come from TurkStat's Population Census of 2000.

Outcome Variables and Control Variables

- The focus of the paper is on high school attainment for individuals whose high school education could have been affected during the period 1994 to 2000.
- The main outcome variable and control variables come from TurkStat's Population Census of 2000.
- Data on educational attainment (primary, high school, and vocational, etc.) and demographics like population, age, gender, and economic activity are reported by municipality and age groups.

Outcome Variables and Control Variables

- The focus of the paper is on high school attainment for individuals whose high school education could have been affected during the period 1994 to 2000.
- The main outcome variable and control variables come from TurkStat's Population Census of 2000.
- Data on educational attainment (primary, high school, and vocational, etc.) and demographics like population, age, gender, and economic activity are reported by municipality and age groups.

Outcome Variables and Control Variables

- The focus of the paper is on high school attainment for individuals whose high school education could have been affected during the period 1994 to 2000.
- The main outcome variable and control variables come from TurkStat's Population Census of 2000.
- Data on educational attainment (primary, high school, and vocational, etc.) and demographics like population, age, gender, and economic activity are reported by municipality and age groups.
- The paper focuses on the share of the 15-20-year cohort who completed high school in the 2000 census.

Outcome Variables and Control Variables

- The focus of the paper is on high school attainment for individuals whose high school education could have been affected during the period 1994 to 2000.
- The main outcome variable and control variables come from TurkStat's Population Census of 2000.
- Data on educational attainment (primary, high school, and vocational, etc.) and demographics like population, age, gender, and economic activity are reported by municipality and age groups.
- The paper focuses on the share of the 15-20-year cohort who completed high school in the 2000 census.

Outcome Variables and Control Variables

- The focus of the paper is on high school attainment for individuals whose high school education could have been affected during the period 1994 to 2000.
- The main outcome variable and control variables come from TurkStat's Population Census of 2000.
- Data on educational attainment (primary, high school, and vocational, etc.) and demographics like population, age, gender, and economic activity are reported by municipality and age groups.
- The paper focuses on the share of the 15-20-year cohort who completed high school in the 2000 census.
- Matching municipalities across time periods is done manually, and there is some loss of observations when combining the data set of the 1994 election and the 2000 census.

Summary Statistics

^aThe table reports results for outcomes from the five elections occurring in 1999, 2002, 2004, 2007, and 2009. Columns 1–5 have Islamic vote shares as the outcome. Column 6 has the female share of municipal council members from all parties as the outcome, while columns 7 and 8 have the female shares of municipal council members from Islamic and secular parties, respectively. Panel A reports standard OLS estimates for the entire sample with (Model 1) and without (Model 2) controls. Panel B reports results from local linear RD specifications with covariates and bandwidth sizes \hat{h} , $\hat{h}/2$, and $2\hat{h}$ in Models 1, 2, and 3, respectively. The bandwidth \hat{h} is determined by the Imbens and Kalyanaraman (2012) algorithm. All RD specifications include a linear control for the Islamic win margin on each

Discussion 1

- The results are consistent with an explanation that emphasizes the Islamic party's effectiveness in overcoming barriers to female entry for the poor and pious.

Discussion 1

- The results are consistent with an explanation that emphasizes the Islamic party's effectiveness in overcoming barriers to female entry for the poor and pious.

Discussion 1

- The results are consistent with an explanation that emphasizes the Islamic party's effectiveness in overcoming barriers to female entry for the poor and pious.
- Underspecified causal mechanisms:
